PART I  Know the Terrorist

Chapter 1  Your Mission: Critical Awareness ....................... 3
  Adopt an Intelligence-Based Approach to
  Antiterrorism .................................................................. 4
  Avoid a Stereotype-Based Approach to
  Antiterrorism ................................................................... 5
  Defensive Action: The Detect, Deter, Defend
  (3D) Doctrine ................................................................. 6

Chapter 2  Who They Are: Identifying Terrorist Operatives .... 9
  If You Know the Terrorists, You Know Their
  Plans ............................................................................... 9
  Rule 1: Anyone Can Be a Terrorist ................................. 10
  Who Are Terrorists? ....................................................... 10
  Classifying Terrorist Operatives by Skills Level ......... 11
  Class I Terrorist: The Government-Trained
  Professional (Including Foreign Intelligence
  Threats) ........................................................................... 13
   Typical Profile of a Class I Terrorist .......................... 13
  Class II Terrorist: The Religious Extremist
  Professional .................................................................. 15
   Typical Class II Terrorist Profile ............................. 15
   Special Characteristics of the Class II
   Terrorist ........................................................................ 16
   The al-Qaeda Class II Terrorist Operative  ............ 17
  Class III Terrorist: The Radical Revolutionary
  or Quasi-Religious Extremist .......................................... 18
   Typical Class III Terrorist Profile ............................. 21
  Class IV Terrorist: Guerrilla/Mercenary Soldier .... 21
   Typical Class IV Terrorist Profile ............................. 22
  Class V Terrorist: Amateur (Civilian,
  Untrained Criminal, or Militia Vigilante) .................. 23
   Typical Class V Terrorist Profile ............................. 23
Chapter 3  Intelligence Profiling Suspected Terrorists .......... 27
   Rule 1: Consider Everyone a Potential Terrorist.... 27
   Basic Questions to Be Considered When
   Intelligence Profiling ........................................... 27

Chapter 4  Terrorist Training ............................................. 33
   Introduction ......................................................... 33
   Terrorist Training Schools and Camps ............. 33
   Terrorist Combat Training ................................. 34
   Preincident Indicators of Terrorist Training
   or Practice .......................................................... 35
   Survival and Tradecraft Training ....................... 36
   Examples of Operative Survival and Tradecraft ... 36
   Use of False Documents ......................................... 37
   Examples of Terrorist Use of Forged or
   False Documentation ............................................ 37

Chapter 5  Terrorism 101: Why the Terrorist Chooses
   This Path .............................................................. 39
   What Is Terrorism? ............................................... 39
   Definitions of Terrorism ....................................... 39
   Are You Capable of Being a Terrorist? .......... 42
   What Is Not Terrorism? ......................................... 44
   Additional Terms .................................................... 45

Chapter 6  What Terrorists Believe ..................................... 47
   The Historical Context of Terrorism ................. 47
   Historical Events That Influenced Today’s
   Terrorism .............................................................. 48
   Revolutionary and Anticolonial Political
   Opposition ............................................................. 48
   Unchecked Governmental
   (aka Establishmental) Terrorism .......................... 48
   The Rise of Modern Islamic Extremism ............... 49
   Incorporation of Narcoconglomerates
   and International Criminal Organizations .......... 52
   Availability of Weapons of Mass Destruction ...... 52
   Ideologies That Terrorists Espouse .................. 53
   Political and Policy-Based Ideologies ............... 53
   Religious Extremist Ideologies ......................... 57
   “Cold Hard Cash” Ideology: Continuing
   Criminal Enterprises (CCEs) ......................... 60
PART II Identifying the Terrorist Group and Its Cells

Chapter 7 Terrorist Group Organization......................... 63
Common Characteristics of Terrorist Groups ...... 63
Terrorist Areas of Operation................................. 65
Classifying Terrorist Sources of Support ............... 65
Terrorist Command and Control Structures .......... 67
Organizational Models............................................. 68

Chapter 8 The Terrorist Cell........................................... 75
Introduction........................................................... 75
Types of Terrorist Cells ........................................ 75
Operative Membership Pools .................................. 76
Terrorist Cell Size.................................................. 76
How Cells and Leadership Communicate............... 77
Terrorist Command and Control Cells ................. 79
Terrorist Intelligence Cells..................................... 79
  Cell Leader........................................................... 80
  Surveillance Team................................................. 80
  Photography Team .............................................. 80
  Penetration Team.................................................. 81
  Security/Driver................................................... 81
  Terrorist Tactical Operations Cells ..................... 81
  Terrorist Logistics Cells........................................ 82

Chapter 9 Terrorist Strategies and Target Selection......... 85
Introduction........................................................... 85
Terrorist Strategies................................................ 85
  Terrorists Prefer Simple Strategies......................... 85
  Strategic Objectives............................................. 86
  Tactical Objectives.............................................. 87
Misdirection and Deception Strategies .................. 87
Wave Strategies....................................................... 89
Strategy Execution Time Lines.............................. 90
  Target Selection (T2—Terrorist Targeteering)........ 90
The Motives–Opportunity–Means (M.O.M.)
Target Selection Principle..................................... 91
General Target Categories..................................... 92
  Hard Targets....................................................... 92
  Soft Targets......................................................... 92
  Specific Target Categories................................. 92
PART III Detection of Key Terrorist Activities

Chapter 10 Terrorist Preparations for Attack

Safe Houses, Finances, and Mobility
Identifying Safe Houses
Terrorist Operations Planning Center
Armory
Bomb Factory
Detection of Terrorist Supply Chains
Terrorist Supply Is an Indicator of Future Activity
Methods of Acquiring Supplies
Detecting Terrorist Logistics Cells
Detecting Terrorist Logistics Cell Activities
Storage of Supplies
Short-Term Storage
Long-Term Storage
Terrorist Transportation and Mobility
Aviation and Flight Support
Maritime Transportation
Computers, Communication, and Intelligence (C2I)
Secret Communications
Identification of Terrorist Financing

Chapter 11 The Terrorist’s Tools: Conventional Weapons

Identification
Terrorist Weapons Sources
Manual Weapons: Knives, Clubs, and Garrotes
Explosives and Bomb Components
Factory-Produced Bombs
Homemade or Improvised Bombs
Booby-Trapped Devices
Improvised Explosive Devices
Handguns: Pistols and Revolvers
Submachine Guns and Machine Pistols
Automatic Assault Rifles (Long Rifles)
Shotguns
Sample of Known Shotguns Used by Terrorists
Heavy or Light Machine Guns (Crew Served)
Antitank Rockets and Guns
Contents

Mortars............................................................. 134
  Production-Made Mortars .............................. 135
  Homemade/Improvised Mortar Systems .......... 135
Surface-to-Air Missiles/Man Portable Air
Defense Systems (SAM/MANPADs)............... 135
  Known MANPAD Missiles Used by
Terrorists ...................................................... 136

Chapter 12 Terrorists’ Tools: Nuclear, Biological, and
Chemical Weapons and Equipment............. 139
  Chemical and Biological Warfare (CBW)-
  Associated Equipment.................................. 139
  Gas Masks..................................................... 139
  Protective Clothes, Chemical
  Decontamination, and Detection Kits.......... 140
  Testing and Development Equipment............. 142
  Storage and Preservation Systems .............. 142
  Chemical or Biological Agent Dispersal
  Systems ........................................................ 142
  Examples of Improvised Chemical or
  Biological Agent Distribution Systems ...... 144
Offensive Chemical Weapons (CWs) ............ 145
  Nerve Agents................................................. 146
  Vesicants (Blister Agents)......................... 148
    Mustard ..................................................... 148
    Lewisite (L).................................................. 149
    Phosgene Oxime (CX)..................................... 150
    Blood Agents (Cyanogens)......................... 150
Choking Agents .............................................. 150
  Phosgene (CG) and Di-Phosgene (DP) ...... 151
  Chlorine (Cl).................................................. 152
Biological Weapons (BWs)............................. 152
  A New Potential Terrorist Tactic: Human-
  Deployed Biological Weapon System
  (HUMANBIOWEPS)........................................ 155
Potential Biological Weapons .................... 156
  Smallpox (Known to Be Weaponized) ...... 156
  Anthrax (Used and Known to Be
  Weaponized)................................................. 157
  Brucellosis .................................................. 158
  Cholera ........................................................ 158
  Glanders and Melioidosis ......................... 158
Plague, Pneumonic (*Yersinia pestis*)
(Used and Known to Be Weaponized) .......159
Q Fever ........................................................ 160
Tularemia, Pneumonic (Known to Be
Weaponized) .................................................. 160
Viral Hemorrhagic Fevers (VHFs) ........ 160
Viral Equine Encephalitis (Venezuelan:
VEE; Eastern: EEE; Western: WEE)
(Known to Be Weaponized) ........... 160
Biological Toxins ........................................ 161
Botulinum (Used and Known to Be
Weaponized) ................................................ 161
Ricin (Used and Known to Be
Weaponized) ................................................ 161
Staphylococcal Enterotoxin-B ........ 162
T-2 Mycotoxin (Believed to Be
Weaponized) ................................................ 162
Nuclear-Related WMD Equipment and
Components............................................. 163
Explosive Dispersal of Radioactive Material
(EDRM)/Radiological Dispersive Device
(RDD)—“Dirty Bomb” ......................... 163
Nuclear Fission Weapons (Atomic Bombs). 164
Construction .............................................. 164
Size and Weight ........................................ 164
Materials .................................................. 164
Detection of Terrorist-Associated Equipment... 164
Expertise Necessary................................. 165
Components and Equipment ..................... 165

**PART IV  Predicting an Attack**

**Chapter 13  Terrorist Surveillance Techniques** ............169
Introduction .............................................. 169
Will You Come under Surveillance? ............ 170
Who Conducts Surveillance? ..................... 170
Methods of Surveillance ............................. 171
Types of Surveillance .................................. 172
 Visual Surveillance .................................. 172
  Imagery Surveillance ............................... 172
  Technical Surveillance ............................ 174
Detecting Surveillance ............................... 176
Chapter 14  Detecting Infiltration and Special Mission Techniques
Introduction ........................................................................................................... 177
Terrorist Operatives: Special Cultural Survival Skills........................................... 177
   Indicators of Trusted Agent Infiltration or Intelligence Collection .................. 178
   Cover Story and False Identity Usage ................................................................. 179
      Use of “Clean” Operatives ............................................................................. 179
      Detection of Clean Operatives ...................................................................... 180
      Use of False Identity (Dirty Operatives) ....................................................... 180
      Detection ........................................................................................................ 180
   Special Mission Tactics and Techniques ............................................................. 181
      Defeating Border Controls and Customs ......................................................... 181
      Defeating Airport Controls and Aviation Transportation Security ............ 182
         Authorized Access with Valid Identification .............................................. 182
         Illegal Access ............................................................................................. 182
   Special Mission Tactics and Techniques: Defeating Maritime Security ............. 184
      Infiltration of Harbors .................................................................................... 185
   Special Mission Tactics and Techniques: Defeating High-Value Target Physical Security ... 189

Chapter 15  The Decision and Attack Sequence: The Last Chance to Stop an Attack ........................................ 191

Ten-Phase Sequence of Terrorist Action ............................................................... 191
   Phase 1—Terrorist Leadership Makes a Decision ............................................... 192
   Phase 2—Intelligence Collection Cell Deployment and Infiltration .................. 192
   Phase 3—Final Target Selection and Planning .................................................... 193
   Phase 4—Terrorist Cell Activation: Sleeper Cell .............................................. 193
   Phase 4—Terrorist Cell Activation: Logistics Cell ............................................. 194
   Phase 4—Terrorist Cell Activation: Tactical Operations Cell ............................. 194
   Phase 5—Go/No-Go Decision .......................................................................... 195
   Phase 6—Tactical Operations Movement to Target ......................................... 195
Phase 7—Point of Failure: Tactical Action ............................................................... 196
Phase 8—Withdrawal and Extraction Phase ......................................................... 196
Phase 9—Regroup, Rearm, and Exfiltration ......................................................... 197
Phase 10—Negotiation/Credit/Debriefing .............................................................. 198

### Chapter 16

The Basics of Analyzing Intelligence and Predicting Terrorism Events .................. 201

- People Are Predictable...So Is Terrorism ...................................................... 201
  - Estimating versus Speculating ....................................................................... 204
  - Making a Prediction ....................................................................................... 204
- The Basics of Predicting and Preventing Terrorism .......................................... 205
  - Collect ............................................................................................................. 205
    - Through Regular Intelligence Methods ..................................................... 205
    - Through Classified US Government Materials, Sources, and Methods .... 206
  - Study the Incident after the Point of Failure .................................................. 208
  - Study Historical Incident Data ................................................................. 208
- Analyze ............................................................................................................. 208
  - Analytical Product and Components ............................................................. 209
  - Analytical Process—Evaluation .................................................................... 213
  - Analytical Process—Common Sense and Logic Questions ............................ 221
  - Analytical Process—Integration ................................................................. 225
  - Predicting Terrorist Courses of Action ....................................................... 226
- Conclude .......................................................................................................... 226
  - Report ............................................................................................................ 227
    - Unreported Intelligence Supports the Terrorists ...................................... 227
  - Respond ......................................................................................................... 228
- Integration and Interpretation Simulated Case Study ......................................... 229

### Chapter 17

Point of Danger: Law Enforcement Traffic Stops and Encountering Terrorists .......... 233

- Introduction .................................................................................................... 233
- Terrorists and the Patrol Officer ..................................................................... 234
- Terrorist Intelligence Profiling and the Traffic Stop ........................................... 235
- Indicators of Foreign Terror Suspects during the Traffic Stop .......................... 237
Traffic Stop Indicators and Warning Signs for American Antigovernment Extremists and Terrorists ............................................................ 239
Case Studies of Terrorist Traffic Stops before and after Terrorist Acts ........................................ 241
Dangerous Terrorist Traffic Stops: Anti-Defamation League’s Chart of Antigovernment Encounters ......................................................... 248

Chapter 18 Terrorist Operations and Tactics ................. 251
Recognizing the Point of Failure ................................ 251
Terrorist Attack Profiles ............................................ 252
Explosives Bombing Attack ........................................ 252
  Manual Bombings (Bombs Placed by Hand) ................. 253
  Standoff Bombing (Bombs Launched from a Distance) ........ 253
  Vehicle Bombings (Bombs Attached to or Targeting a Vehicle or That Are the Weapon Itself) .......... 253
Arson or Fire Attack ............................................. 253
Assassination ....................................................... 254
Light Infantry Weapons Attack ................................... 256
Armed Raid ......................................................... 256
Abduction (Kidnapping, Hostage Taking) ............. 257
Barricade or Hostage Barricade ..................... 259
Human-Guided (Suicide/Martyr) Weapon Attack ........ 259
Aviation Attacks .................................................. 261
Maritime Attacks .................................................. 264
Vehicle Commandeering (Hijacking) and Theft ........ 267
Industrial and Infrastructure Attack ..................... 267
Physical Intimidation or Maiming ......................... 268
Psychological Threat ............................................. 269
Improvised or Offensive Chemical Weapons Attack .............................................................. 269
Biological Terror Weapons Attack ....................... 269
Agroterrorist Attack ............................................. 270
  Diseases That Primarily Affect US Cattle, Swine, and Poultry ........................................ 271
  Crop Diseases of Concern .................................... 272
Nuclear Systems and Radiological Materials Attack ............................................................. 272
PART V  The New Fields of Terror

Chapter 19  A Primer on al-Qaeda and the Global Extremist Insurgency

Introduction .......................................................... 279
The al-Qaeda Global Insurgency—
“al-Qaedaism” .......................................................... 279
Leader of the Global Salafist Insurgency—
Osama bin Laden ...................................................... 280
Bin Laden in the Afghanistan War ......................... 281
Creating al-Qaeda ..................................................... 282
AQ’s History of Anti-Western Attacks .................... 283
Bin Laden Declares War on America ..................... 284
Al-Qaeda Attacks and America Strikes Back ......... 284
The Global War against Terrorism ......................... 286
The Death of Osama bin Laden ............................... 286
AQ Senior Leadership Personalities ....................... 288
Al-Qaeda’s Ideology and Philosophy ....................... 290
AQ’s Organizational Philosophers ......................... 290
AQ Strategic Goals ................................................... 291
Characteristics of the al-Qaeda Mission ................. 292
Al-Qaeda’s Political Strategy ................................. 293
Generational Development of al-Qaeda
(1988–2008) .......................................................... 294
Commonality of Mission across AQ’s Four Generations ........................................ 294
  Generation 1.0—Leadership and Philosophy
  Generation 2.0—Development of Terrorist Cadres
    Combat/Terror Education System ....................... 296
  Generation 3.0—Global Confrontation and Inspiration
  Generation 4.0—Invasion of Iraq and the Future
  Struggle (2003–Present) ....................................... 297
Contents

Generation 5.0? The Next Generation of Operatives ................................................................. 299
AQ Organization’s Targets ................................................................................................. 299
The Far Enemies ................................................................................................................. 299
The Near Enemies .................................................................................................................. 301
The al-Qaeda Terrorist Military Committee (1991–Present) ................................................ 305
Key Operatives of the Military Committee’s Terror Command .............................................. 306
Military Committee Subordinate Commands (below Headquarters Level) ...................... 308
Noteworthy al-Qaeda Terrorist Operatives ............................................................................. 311
Americans in al-Qaeda ............................................................................................................ 315
Americans in al-Qaeda Affiliates ......................................................................................... 319
Al-Qaeda-Inspired Attacks/Attempts by Radicalized Americans ......................................... 320
Historical Basis for AQ Military Tactics .............................................................................. 322
The Terror Diaspora—Extremist Franchises and Supporting Groups ................................... 324
  North Africa .......................................................................................................................... 324
  The Mediterranean Levant ................................................................................................. 325
  Arabian Peninsula and Gulf ................................................................................................. 326
  Sub-Saharan Africa ............................................................................................................. 328
  South Asia and Indian Subcontinent ............................................................................... 329
  Europe and the United Kingdom .................................................................................... 330
The Internet—The Virtual Jihad ............................................................................................ 332
  As-Sahaab Media—AQ’s Media and Intelligence Distribution Arm .................................. 332
  Internet Connectivity Platforms ....................................................................................... 334
  E-Learning ............................................................................................................................ 334

Chapter 20 Suicide Terrorism: Tactics, Equipment, and Management .................................................. 337

Introduction .......................................................................................................................... 337
History of Suicide Terrorism ............................................................................................... 338
Definitions ............................................................................................................................. 340
  Other Definitions ............................................................................................................... 341
  Nonterrorist Suicide Events .............................................................................................. 341
Suicide Bomber Profile ......................................................................................................... 341
Suicide Bomber Characteristics ............................................................................................ 342
Unique Suicide Bomber Profiles ........................................................................................... 342
  Mentally Ill Surrogate Suicide Bomber ........................................................................... 342
  Child-Borne SPBIED ......................................................................................................... 343
The Female Suicide Bomber ....................... 343
Females Disguised as Men ....................... 343
Black Widow Suicide Bombers ................. 343
Husband and Wife Suicide Bomber Teams ... 344
Family Suicide Bombing ....................... 344
Mass Hostage Suicide Attack ................. 344

Human-Guided Weapon Tactics, Techniques,
and Procedures ........................................ 345
SPBIED, Pedestrian-Borne Suicide/
Martyrdom Explosive Attack—Manual
Delivery .................................................. 345
M-SPBIED, Maritime Pedestrian-Borne
Suicide Improvised Explosive Device
Attack—Manual Delivery ................................ 345
SPBIED Concealment Locations .............. 346
Suicidal Human-Deployed Biological
Weapon .................................................... 347
SVBIED—Vehicle-Borne Suicide/
Martyrdom Bomb, Land (aka Suicide Car
Bomb or Truck Bomb) .............................. 347
VBIEDs—Detonation/Triggers .................... 348
AS-VBIED, Skyjacking/Aircraft as
Weapons System ........................................ 349
M-SVBIED, Vehicle Delivery, Maritime .... 350
Unusual SVBIEDs ...................................... 351
S-LIWA—Suicide Light Infantry Weapons
Attacks ..................................................... 351

Human-Guided Weapon/Suicide Terrorism
Intelligence Indicators ................................ 351
Suicide/Martyrdom Preparation ............... 351
Safe House Indicators .............................. 352
Suicide/Martyrdom Bomber Preincident
Behavioral Indicators .............................. 353
Suicide/Martyrdom Bomber Indicators—
En Route to Mission ................................. 353

The Critical Moment: Confronting the Suicide/
Martyrdom Bomber .................................. 355
Law Enforcement Officer—Rules of
Engagement (LEO-ROE) ......................... 355
In Extremis Response for Law
Enforcement ........................................... 356
Military/Force Protection Rules of SPBIED/
SVBIED Engagement ............................... 358
Military In Extremis Response in Close
Quarters Combat ................................. 359
Chapter 21  Terrorism and Insurgency in Iraq and the Changing Middle East (2003–2013) .......... 361

Introduction .......................................................... 361
Terrorism in the Invasion of Iraq .................. 362
Beginning of the Insurgency ......................... 364
Three Wings of the Insurgency ................. 365
   Former Regime Elements (FREs) and Loyalists (FRLs) .... 365
      FRE/FRL Organization .................................. 365
      FRE/FRL Resistance Areas of Operations ... 366
Iraqi Religious Extremists (IREs) .......... 366
Al-Qaeda in Iraq and Jihadi Foreign Fighters .... 367
   Al-Qaeda in Iraq (AQI) .......................... 368
      AQI Manpower, Weapons, and Tactics .. 370
The Shiite Insurgency ............................... 371
Terror Cells/Groups (“Battalions/Brigades”) ... 371
   Terrorist Weapons in Iraq ....................... 372
Iraq: A Continuing Education in Global Terror ... 375
The Arab Spring and New Roles for Old Terror (2010–2013) ......... 376
   The Libyan Revolution ........................... 377
   The Syrian Civil War ......................... 378

PART VI  Supplemental Data: Bibliography and Appendices

Bibliography .......................................................... 383
   Publications .................................................. 383
   Government Documents .......................... 385

Appendix A: Global Terrorist Groups ................. 387

Appendix B: Explosive Components and Ingredients
Checklist .......................................................... 393
   Bomb and IED Components ....................... 393
      Delay Mechanisms Examples .................. 393
      Initiators ............................................... 393
      Fuses ..................................................... 393
      Initiator—Action Firing Devices ................. 393
   Explosives and Ingredients Identification
      Checklist ............................................... 394
         Low Explosives .................................. 394
         Primary High Explosives .................. 394
         Secondary High Explosives .............. 394
         Homemade Explosive Chemical Indicators ... 394

Index .......................................................... 397
